Mr. Aladdasi:

The Sustainable Technologies Molded Facet Assembly attachment system can be used with any Firestone Adhered single-ply membrane as an enhancement to a solar racking system. Please contact the manufacturer and your solar racking system provider for specifications and installation instructions for their systems.

This letter only refers to the compatibility of the product attachment system with the Firestone roofing system. This is not an endorsement or representation of any warranty regarding the overall performance of the attachment system itself.

The installation of the attachment system will not void the Firestone Roofing System Warranty; however, any damage or leaks caused by the attachment system will not be covered by the Firestone Roof System Warranty, and it will be the responsibility of the Building Owner to make repairs with a Firestone licensed contractor.

Thank you for your cooperation. Please do not hesitate to contact me directly should you have any questions or comments.

Sincerely,

**Peter F. Wims**
